

Full-Stack & Mobile App Development Internship (3 Months)

Company: Faslit Accor Private Limited (Platform: LIT)

Location: Remote / Hosur, Tamil Nadu

Website: www.luxuryintaste.com

Contact: info@luxuryintaste.com | WhatsApp: 7200390614

About the Company

Faslit Accor Private Limited, the company behind LIT, is a fast-growing fashion-tech startup based in Hosur, Tamil Nadu. LIT is a next-gen fashion gaming platform that blends immersive digital experiences with real-world commerce. We currently operate across three core verticals:- A curated e-commerce platform offering fashion and lifestyle products.- A vibrant newsletter delivering luxury fashion, fast fashion, sustainability, and sneaker insights.- A highly anticipated fashion-based game (currently under redevelopment). We value discipline, innovation, and creativity offering a space where you can grow fast, contribute meaningfully, and enjoy your work.

Role Overview

We're seeking Full-Stack & Mobile App Development Interns for a 3-month internship. This opportunity is open to 3rd-year students who are looking for practical exposure. The ideal candidate should be well-versed in React.js, Node.js, Dart and Flutter, with a basic understanding of Microsoft Azure.

Key Responsibilities

- Web Development (React + Node.js):
 - Develop responsive UI using React.js.
 - Build and integrate RESTful APIs using Node.js/Express.
 - Work with databases (Azure /MySQL) for backend logic and storage.
- Mobile App Development (Flutter + Dart):
 - Design and build cross-platform mobile applications using Flutter.
 - Integrate mobile apps with backend APIs.
 - Implement state management (Provider/BLoC).
- Cloud & Deployment:
 - Deploy applications on Microsoft Azure.
 - Understand basic cloud services, authentication, and app hosting.

Requirements

- Proficiency in React.js, Node.js, Flutter, and Dart.
- Understanding of REST APIs and full-stack project flow.
- Familiarity with Microsoft Azure deployment and services (basic level).
- Knowledge of Git and version control.
- Ability to work independently and collaboratively in a fast-paced team.

Nice to Have

- Azure Functions or App Services knowledge.
- UI/UX basics and responsive design understanding.

Eligibility

- Open to 3rd-year students, recent graduates, or self-taught developers.
- A portfolio or GitHub profile is a strong plus.

Duration

- 3 Months (Flexible start)
- On-site role.

What You'll Gain

- Mentorship from a multidisciplinary tech team.
- Hands-on exposure to a real production ecosystem (web + mobile).
- LOR (Letter of Recommendation) and potential pre-placement offers.
- Direct contribution to our game, e-commerce, and cloud platform.
- Stipend
